1. As chair of the Breed Standard Committee over the past six months I have responded to questions either received via email, phone calls or face to face. The questions have been in related to the subjects of wether certification, progeny testing, colors, random markings and registration. When necessary I have referred these questions on to more appropriate committee chairs or the Central Office.
2. I have discussed several paths forward for this committee in 2012 with a few of this committee's members and will develop a mutually agreed upon direction in January 2012.

Respectfully submitted,
David F Wortham, Chair
